The present study makes an attempt to understand the Monetary value of youth towards marriage. The results revealed that marriage fulfils various needs of individuals. Fulfilling the needs depends upon the monetary or economic resource that each partner brings in marriage. One of the strong feelings expressed are their duty to support their husband economically. The results revealed that 92 percent expressed in selecting the marriage partner economic status of the family must be counted, 83 percent expressed family finance should be left to a wife to have economic independence, 98 percent expressed in present days it is also a duty of wife to support her husband economically.

Introduction

The path to a stable family life has become longer in recent decades. Monetary or Economics seem likely to be a key factor affecting young adults' relationship quality. Several studies have linked financial instability to relationship dissolution and divorce (Burstein, 2007; Hoffman & Duncan, 1995; Kalmijn, Loeve, & Manting, 2007; Lewin, 2005; South, 2001). Explanations for this relationship suggest that economic hardship may place stress on couples, thereby increasing conflict and leading eventually to divorce (Ono, 1998; White & Rogers, 2000). Understanding how and under what

circumstances economic factors affect perceived relationship quality will contribute greatly to an understanding of the sources of stability and stress for young couples.

Materials and Methods

It focused on youth (15 to 29 years). The main focus of the study was to study monetary value of youth towards marriage.

Results and Discussion

The data collected with respect to understand the Monetary value of youth towards marriage.

Table.1

(n=60)

S.no	Statements	Total		
		Category	F	P
1	In selecting the marriage partner economic status of the family must be counted	Yes	55	92
		No	5	8
2	Family finance should be left to a wife to have economic independence	Yes	50	83
		No	10	17
3	In present days it is also a duty of wife to support her husband economically	Yes	59	98
		No	1	2
		Total	60	100

The results revealed that 92 percent expressed in selecting the marriage partner Economic status of the family must be counted, 83 percent expressed family finance should be left to a wife to have economic independence, 98 percent expressed in present days it is also a duty of wife to support her husband economically.

The data collected with respect to understand the Monetary value of youth towards marriage. The results revealed that marriage fulfils various needs of individuals. Fulfilling the needs depends upon the monetary or economic resource that each partner brings in marriage. One of the strong feelings expressed are their duty to support their husband economically.
